AUSTRALIAN TACTICAL MEDICAL CONFERENCE  
7 - 10 OCTOBER 2025 | BRISBANE

**“ATMC is always about you  
- the clinician, trainer,  
planner, and leader.”**

# WELCOME

Hello to All,

On behalf of the Board and Committee Members of the Australian Tactical Medical Association, it is my absolute pleasure to welcome you to the Australian Tactical Medical Conference for 2025.

The success of last year's conference and how much ATMC has continued to grow and evolve gives me so much excitement and motivation. As we welcomed new members to the Board and Committee including myself as President, we quickly got to work organising ATMC25. We are again excited to offer an additional day of presentations that continue to deliver valuable insights and enlighten us with other incredible experiences. These opportunities to engage with leading experts and developing members in our field allow us to dive deeper into emerging trends, share innovative ideas, and foster meaningful discussions that will empower you in your professional journey.

We again have the privilege of offering pre-conference workshops tailored to provide hands-on learning and skill-building. These workshops are a fantastic opportunity to gain practical experience and enhance your knowledge before the main conference. Whether you want to refine your skills, explore new tools, or network with fellow professionals, these sessions are designed to set the stage for a successful conference experience. Both endeavours will evolve our conference and help distinguish ATMC as a key event in the professional development calendar.

With another diverse line-up of local and international presenters, the program brings together a huge amount of experience and innovative perspectives. Case studies of intentional mass violence in civil community, extraordinary medical response and challenges faced by civil emergency services, research into how we train military medics, medical considerations for contemporary warfare and learning from international experiences, are a small example of this year's dynamic program. From thought leaders and trailblazers to practical practitioners, each speaker is here to share their unique insights and inspire others.

Our Industry Partners continue to support ATMC, and we invite you to explore our vibrant conference trade show. This dynamic space is designed to connect you with cutting-edge products, services, and solutions. Our Partners and Exhibitors aren't just interested in selling a product - they are as critical to your mission success as your planners, trainers and logistic support. This is a fantastic opportunity to engage with the Exhibitors, discover the latest advancements, and make valuable connections that can drive your work forward. Of note, I would like to acknowledge the support provided by the ATMC25 Platinum sponsors, TacMed Australia and Device Technologies Australia. We value not only the support provided to ATMC, but to the broader community and we can't wait to continue working with them well into the future.

The ATMA team are passionate about this field and want nothing more than to deliver the best possible conference every year. Although it has its challenges it is very rewarding to bring everyone together. I thank our committee and extended team of volunteers for again putting together a conference of this calibre, supported by our conference managers, YRD, who have worked tirelessly to create a conference that provides an opportunity to learn, network and collaborate.

ATMC is always about you - the clinician, trainer, planner, and leader. We gather to hear and discuss your stories, experiences, lessons learned, and successes so that you are prepared to be the best you can be on the day someone needs you.

Welcome to the Australian Tactical Medical Conference 2025!

**Dave Healy**  
President - Australian Tactical Medical Association

ATMA is a not for profit that represents the interests of Australians involved in the provision and development of tactical medicine across the spectrum of applications, from the general emergency services response to high threat incidents, right through to highly specialised providers in military, police and other special operations groups.

Our mandate is driven by our memberships enthusiasm to continually improve and provide the highest level of first aid and medical care in austere, dangerous, remote and dynamic environments.

The development of improved capability to save lives is the underlying principle of ATMA, and this is achieved through advice, advocacy, training, networking, collaboration and the annual Australian Tactical Medical Conference.

Empowering Australia's first responders with *life-saving* trauma first aid equipment, training and site medical services.

## PRESIDENT'S FOREWORD

Back in 2017, I was both surprised and honoured to be invited to help establish the Australian Tactical Medical Association (ATMA). That initial surprise quickly turned into excitement as a group of likeminded professionals from diverse organisations came together, united by a shared passion and vision. What struck me most was how many of us, and others we knew, were independently striving toward similar goals within our respective organisations.

What began as simple questions, “What medical training do soldiers receive compared to frontline police?” and “Should we embed clinicians within tactical teams or train operators in clinical care?”, soon evolved into more complex challenges: “How do we gain approval for point-of-injury blood transfusions?” and “What defines best practice in mass casualty events driven by intentional violence?” It became clear that, in Australia, no existing conference or organisation truly supported the delivery of medical care in tactical, high-threat, or austere environments. While other pre-hospital and military medical bodies existed, their broad scopes often left this niche field overlooked.

Since ATMA's inception, both the Association and our annual conference have grown beyond anything we imagined. Each year, professionals from across Australia and around the world gather to share insights, experiences, and lessons learned. Sadly, there's no shortage of real-world events to learn from such as ongoing conflicts, disasters, and crises continue to unfold globally. Whether natural or man-made, the human toll remains constant. And with that, so does our responsibility: to be prepared. Prepared to meet the threat. Prepared to meet the expectations of those who rely on us. Prepared to go further.

In my first year as President of ATMA, I am deeply humbled and proud of the strides we've made to better support our members and delegates. Our webinar series has continually showcased clinicians and leaders whose diverse experiences enrich our community and encourage participants to challenge and expand their own practice. In the short term, **ATMA has decided to pause webinars**, following feedback from members who prefer presenting at ATMC rather than online. All past webinars remain accessible via the **CPD Hub**, so members can watch replays anytime to continue their professional development. ATMA is also inviting expressions of interest from members who wish to contribute to future online events and present on topics they are passionate about.

**“Since ATMA's inception, both the Association and our annual conference have grown beyond anything we imagined.”**

The Journal of High Threat and Austere Medicine (JHTAM) continues to be a platform for collaboration, shared experience, and professional growth—core values of ATMA. Its focus isn't on established authors, but on the clinicians, trainers, enablers, and leaders working at the coalface. Austere and high-threat medicine may be a niche field, but its impact on communities is profound. By empowering emerging voices, we hope to advance the discipline and improve both mission and patient outcomes.

The annual Australian Tactical Medical Conference (ATMC) remains central to our mission. We recognise that your time is invaluable, and we're committed to ensuring ATMC delivers professional, personal, and practical value. This year, we're returning to a dedicated conference venue and continuing pre-conference workshops, steps designed to enhance the experience and ensure every attendee leaves with meaningful takeaways.

As new members and fresh ideas join ATMA, we continue to reflect on our journey and look ahead. Our mandate has always been to foster collaboration, connection, and shared learning for positive change. The passion and emotion shown by presenters and attendees at past conferences have directly

influenced capability development across organisations. We remain committed to driving that change, especially in the wake of recent tragedies, and I believe it's time for greater understanding and engagement at the executive level across all sectors.

Building on our successful partnership with the Special Operations Medical Association, ATMA will continue to expand its network and forge strategic alliances with like-minded organisations to benefit the tactical, high-threat, and austere medical community.

Finally, I want to extend my heartfelt thanks to everyone who has supported ATMA. The Association is powered by volunteers who generously give their time and energy, and we are deeply grateful for their dedication. To our members, partners, and attendees, thank you for your continued support and advocacy. Your passion is what drives ATMA forward as we reshape the future of tactical medicine in Australia.

*Dave Healy*  
President – Australian Tactical Medical Association

The banner features the JHTAM logo on the left, which includes the text 'JHTAM' in large white letters and 'The Official Journal of the Australian Tactical Medical Association' in smaller white text below it. To the right of the logo, the title 'Journal of High Threat & Austere Medicine' is written in a large, white, sans-serif font. Below the title, the text 'AN OPEN ACCESS, ONLINE, PEER-REVIEWED JOURNAL FOCUSED ON THE FIELD OF HIGH THREAT AUSTERE MEDICINE' is displayed in a smaller, white, all-caps font. At the bottom of the banner, five vertical columns are separated by thin white lines, each containing a white text label: 'Case studies', 'Original research', 'Translating research and knowledge into practice', 'Clinical Practice Guidelines', and 'Reviews'. At the very bottom, a white rounded rectangle contains the URL 'journals.cambridgemedia.com.au/jhtam' in a dark blue font.

# CONFERENCE PROGRAM & WORKSHOPS

**TUESDAY**

**7<sup>TH</sup> OCTOBER 2025**

TIME	WORKSHOP	VENUE
0730 - 1700	Registration (pre-conference workshop attendees only)	Plaza Auditorium Foyer
0800 - 1200	Nerve Agents	
0800 - 1200	Pre-Veterinary Care	
0800 - 1700	TraumaSim Moulage Workshop	
0800 - 1700	Tactical Emergency Casualty Care (TECC)	
0800 - 1700	Medical Training for Law Enforcement

Medical technology for unconventional operations

### MEDUVENT Standard

- Flexible, oxygen-independent mobility due to turbine technology
- Diverse ventilation modes for invasive and non-invasive ventilation
- The hygiene filter protects patient, staff and the ventilator from contamination
- Replaces BVM and triggers mechanical breaths quickly and safely via MEDUtrigger
- Built to military standards, easy to operate

### Medical packs for all scenarios

- Custom designed for professional use
- Trauma, resus and drug kits
- Backpacks or carry bags
- Supplied to every ambulance service in Australia
- Made in Australia since 1982

### Environfrei

Our revolutionary material is free from hazardous elements, delivers a strong fabric that minimises the chance of cross-contamination and prevents dangerous chemicals remaining on the surface.

- Improved cleanable surface
- Antimicrobial, mildew and oil resistant
- Abrasion resistant
- Extreme hot/cold temperature resistant
- High elasticity
- UV resistant
- Stylish

# ATMA MEMBER UPDATE – CPD & WEBINARS

## Webinars Update

In the short term, ATMA has elected to pause webinars. This decision comes after considerable feedback, with many individuals preferring to present at ATMC rather than via webinar.

However, all past webinars remain accessible through the CPD Hub. Members can watch replays at any time to continue their professional development.

ATMA is also seeking expressions of interest from members who may wish to contribute to online events and present on topics they are passionate about.

If you are interested, please contact Matthew Richardson at [matthew.richardson@atma.net.au](mailto:matthew.richardson@atma.net.au)

## ATMA Commitment

ATMA remains committed to increasing awareness, knowledge, and understanding of tactical, high-threat, and austere environments. Our CPD programs continue to focus on being progressive, comprehensive, interactive, and engaging for all members and conference delegates.

## CPD Achievements

Since commencing webinars, ATMA has provided more than 32 hours of online CPD to members. These sessions have featured a diverse range of presenters from both Australia and internationally. All recordings are available via the CPD Hub.

## ATMC25 CPD Breakdown

Delegates attending ATMC25 received a total of 17 hours/credits of face-to-face education. Each delegate is responsible for self-reporting their credits to their registered body.

ATMA will also provide a certificate detailing the CPD credits obtained at ATMC25. This certificate will be sent to personal email addresses following the completion of ATMC25.

We thank you for your continued support of ATMA and look forward to engaging with you in future CPD opportunities.

Sincerely,
